Abstract

Spatial meaning is defined and the interplay between spatial meaning, spatial experience and design formulation is discussed.

Keywords

Spatial meaning,
design formulation

Notes

¹ The first author acknowledges that the ideas developed in this paper bear the influence of discussions with Yves Abrioux, and Noele Batt as well as Yves Marie Visetti. The way in which these discussions have filtered into the paper may not yet resonate with the specific theoretical frameworks that they explore. Ken Knoespel's contributions to the work discussed is too pervasive to be acknowledged in detail.
